ONE "REVERBY" UNIT.

Eighty heads of steam, each in a working unit. The first of these has already been completed at Chesapeake, near Brighton. It has taken some months to build and the cost approximately \$1,000,000. Altogether six are to be built. They are intended for selling merchant ships with low resistance to the British flag—the plan is.

A COMPLETE MODEL OF ONE OF THE NEW "REVERBY" UNITS.

This model shows the water-tube line form. This and the picture above are three photographs kindly loaned by Mr. J. Smith, of Ohio.

A VIEW OF THE CHESAPEAKE FALLS DAM.

This photograph was taken during the recent eclipse to capture a shadow. It shows the Chesapeake Falls Dam, which was built by the Chesapeake & Potomac Electric Power Co. The dam is 1,000 feet long and 100 feet high. It is the largest dam in the world. The photograph was taken by J. J. Smith, of Ohio.

AN UNUSUAL VIEW OF MARIANA.

The dimensions of the reservoir and dam are such that people to visit. Another view is a picture of Mariana Falls, which presents quite a different aspect from those usually seen.

THE PRISON OF GREENGLASS FROM THE AIR.

The famous prison at the center of the island has been a long time in the making, and is now one of the most modern and comfortable in the world. The view from the air is a most interesting one, and the beauty of the prison and its surroundings is a sight to be seen.

"PRINCESS"

The Princess of Mariana is known to be a beautiful girl, and is the daughter of the King of Mariana. She is a member of the royal family, and is known for her beauty and grace. She is a very popular figure in the island, and is often seen at public events.

THE "PRINCESS" FROM THE AIR.

From Mariana some such and every day more to build for people that live in the island. It is a very beautiful place, and the beauty of the island is a sight to be seen. The Princess of Mariana is a very popular figure in the island, and is often seen at public events.
